

AUTHORS' CATALOGUE OF THE BOTANICAL
ARTICLES PUBLISHED IN THE JOURNAL OF THE
BOMBAY NATURAL HISTORY SOCIETY-II
(VOL. 67-76; 1970-1979)¹

Compiled by
A. R. DAS²

The first catalogue of this series was published in this journal [Vol. 73(1): 98-120, 1976] representing Vols. 1-66, 1886-1969. The second series is presented here covering subsequent ten years. For easy retrieval of botanical informations, scattered in this journal, such catalogues are expected to go a long way as an important aid to scholars, engaged in research of botany in India. Entries have been done here alphabetically under single author, followed by joint authors alphabetically and then chronologically. Similar catalogues are expected to be compiled in future, after sufficient number of volumes of this journal are published.
